**Fill in the gaps.**

$9^2$ - nine [ squared ]

$6^9$ - six to the [ power ] of nine

$\sqrt{64}$ - the [ square ] root of sixty four

12 lb - 12 [ pounds ]

10 : 2 = 25 - Ten [ divided ] by two is five.

$km^2$ - [ square ] kilometer

F° - [ fahrenheit ]

**Fill in the gaps with prefixes.**

$10^{-12}$ L - pico litre

$10^{-6}$ L - micro litre

$10^{-2}$ L - centi litre

$10^{3}$ L - kilo litre

$10^{9}$ L - giga litre

**Fill in the gaps with the words in bold. There are two extra words you don't need.**

**overlap exaggerate authorized leverage gene arise holistic distill intrinsic consent tissue encounter advent foster uphold fraud predictive shrink impartiality prosthetics**

1. Engineers must Uphold the highest standards of integrity.
2. Holistic approaches consider the entire system, not just individual components.
3. Informed Consent is necessary for any research involving human subjects.
4. Merit-based hiring practices can help Foster diversity and innovation in engineering teams.
5. Understanding the Overlap between different cell types is pertinent to developing effective treatments for diseases.
6. Validating the accuracy of Predictive models is crucial to ensure that they are reliable for clinical use.
7. Researchers are studying the molecular mechanisms that govern Tissue regeneration in order to develop new therapies.
8. The ethical implications of Gene editing technology must be carefully considered before it is widely implemented in healthcare.
9. Advances in Prosthetics have allowed amputees to regain the use of their limb with greater functionality.
10. The ability to Distill complex information into easily digestible formats is a valuable skill in scientific communication.
11. In some sci-fi stories, technology is able to Shrink objects down to a microscopic size for exploration.
12. The Advent of artificial intelligence has brought about new ethical concerns that must be carefully considered.

Вопрос **3**

Пока нет ответа

Отметить вопрос

**Open the brackets.**

1. If the temperature Reaches (reach) a certain level, the computer automatically will shut down to prevent damage.
2. If we Had not discovered (not discover) electricity, we would still be living in the dark ages.
3. If we don't maintain our technology, it Becomes (become) outdated and ineffective.
4. If we Don’t invest (invest) in training and development for our engineers, we will struggle to keep up with advancements in technology.
5. If we had used better quality materials, the machine Wouldn’t have broken (break) down so soon.
6. If we Had followed (follow) the safety regulations strictly, the accident wouldn't have occurred at the construction site.
7. If the temperature of water reaches 100 degrees Celsius, it Boils (boil) and Turns (turn) into steam.
8. If Newton's Third Law of Motion Didn’t exist (exist), objects wouldn't experience equal and opposite reactions.
9. If I had known how to code, I Would have (be) able to automate repetitive tasks at work now.
